NAUTILUS

PRIVATE RESIDENCES

The structure of the buildings

- Reinforced concrete has been used for the foundation and structure, in accordance with the approved structural earthquake regulations.
- Strip and/or raft foundation
- Reinforced concrete floor slabs
- Separation walls and exterior walls made of light pumice bricks.

The gardens

The beautifully tended garden area is designed with Mediterranean plants, Ficus Australis and olive trees. Beautifully-lit walkways accentuate the contemporary and natural design.

Garden walls will be covered by Monterey Cypress trees and Bougainvillea plants.

A very pleasant living environment is granted by the very low building density, which leaves quite a large area for professionally landscaped and carefully manicured gardens.
